

# Passenger Pigeon Questions

<https://www.audubon.org/magazine/may-june-2014/why-passenger-pigeon-went-extinct>

## Section 1 (paragraphs 1-5)

- 1) How many passenger pigeons were there in 1871?
- 2) When did passenger pigeons go extinct?

## Section 2 (paragraphs 6-14)

- 3) What role did passenger pigeons play in their environments and ecosystems?
  - a. What did they eat?
  - b. How did they fend off enemies?
  - c. How did their nesting habits affect trees? (Think about: what other species depend on trees and would have been affected?)
  - d. How did passenger pigeons affect farmers? List at least two ways.
- 4) What effect do reproduction and survival have on determining whether a species will go extinct? (hint: paragraph 13) (answer in a short paragraph, referring specifically to what happened to the passenger pigeons)

## Section 3 (paragraphs 23-27)

- 5) Describe five threats facing the world's endangered species today.

## Additional Questions

- 6) Use the case study of passenger pigeons to explain the relationship between these words: reproduction, continuity, sustainability, extinction
- 7) In your opinion, describe the most important lesson we should take away from this case study and article?
- 8) Research an endangered species you know little about. What are the biggest threats to this species? What is one thing *you* can do to help this species?
